

Organic Advisory and Education Council Presents:

OAEC / MSU-Ag Experiment Station/Extension Organic Principles Review

Central Agriculture Research Center - July 17th, 2019 @ 11:00-3:00
52583 US Highway 87 – Moccasin, MT

The Montana State University - Central Agricultural Research Center will host a 2019 Organic Principles Review on July 17th, focusing on their initial launch of organic farming research. The event will include an overview of the USDA-OREI awarded grant “CREEP STOP,” and 2019 organic trial studies, field tours, and guest speakers. Lunch will be provided.

Topics during the event will include:

Thistle/Bind Weed research initiated at CARC
Collaboration programs across MT, ND, and WA
Non-Chemical Wild Oat and Kochia Study

Organic Barley Variety Trial
Organic Inoculants Trial
Wheat and Hemp “Date-of-Planting” Trial

Directions: From Stanford on US-87, travel east 16 miles on US-87, turn left at the CARC. From Moccasin on US-87, travel west 2 miles on US-87, turn right at the CARC. <https://goo.gl/maps/QTW6JGreUhbXqRA69>

Tour is free and open to the public. **Registration is appreciated:** <https://forms.gle/WpQn359taRjtNNz88>

The Organic Advisory and Education Council (OAEC) is a non-profit organization made up of Montana certified organic farmers whose mission is to assess priority needs for research and education specific to Montana's organic farming community. OAEC's mandate is to identify and to target funds for essential projects. In an equally important role, OAEC provides information and advice to researchers and educators on areas of critical need in the organic community.
